Docket No. K-0564

Amendments to the Abstract

Please replace the Abstract as originally filed with the following new Abstract:

A method of controlling a drum-type washing machine includes detecting selection of an automatic washing function by a user, sensing a temperature of water supplied to the washing machine during performance of the automatic washing function, comparing the sensed temperature to a reference temperature, and washing a laundry based on a first predetermined washing condition if the sensed temperature is above the reference temperature and washing the laundry based on a second predetermined washing condition if the sensed temperature is below the reference temperature.
